DETAILED ACTION

New Rejections

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 and 30-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Bahar et al. (US 2001/0024755).

Regarding claims 1, 4, 30, and 33

Bahar teaches polymer composition that can consist of polymer and a metal salt or a compound such as trifluoromethane sulfonic acid (paragraphs 0058 and 0059), and since the reference teaches that the polymer contains the salt it would be expected to be able to hold it in place.

Regarding claims 2, 3, 31, and 32

Bahar teaches that the polymer can be polyacrylic acid (paragraph 0059).

Regarding claims 5, 6, 34, and 35

These claims only limit the composition when the acid component is selected from groups 4 or 5 from claims 1 or 30.

Regarding claims 7-9 and 36-38

Bahar teaches that the polymer porosity should be between 40 and 95 %, preferably 70 % (paragraph 042), and since the pores are filled with the acid component, this would read on the claims amount of acid component.

Response to Arguments

Applicant's arguments have been fully considered. These arguments have been found persuasive, therefore, all prior art rejections have been removed in favor of a new rejection over Bahar et al.
